Celebrating Landscapes That Connect People, Nature & Purpose

About Us

Celebrating Landscapes That Connect People, Nature & Purpose

Founded in 2017 and based in Thrissur and Kochi, Green Realm Landscape is a landscape architecture and design practice dedicated to creating meaningful relationships between people, nature, architecture, and place.

Our approach begins with the belief that landscape is not simply an addition to architecture, but an integral part of how a space is experienced, inhabited, and remembered. Each project is shaped through a careful understanding of its site, architecture, climate, ecology, functionality, and the people who use it.

From intimate residential gardens to resorts, hospitality environments, educational campuses, public spaces, and large-scale landscapes, our work explores the balance between built form and the natural environment. Through thoughtful spatial planning, planting design, materiality, levels, circulation, water, light, and landscape infrastructure, we create spaces that are functional, immersive, and deeply connected to their context.

Our multidisciplinary team of Landscape Architects, Landscape Engineers, Botanists, horticultural specialists, and skilled landscape professionals brings together design thinking, technical knowledge, and practical execution. This integrated approach allows us to develop landscapes from the initial concept and site planning through detailed design, construction, irrigation, planting, and long-term landscape development.

Sustainability is embedded within our design process through climate-responsive planning, responsible water management, context-sensitive planting, native and adaptive species, efficient irrigation, and low- maintenance landscape strategies. Rather than treating greenery as decoration, we use landscape as an architectural medium—shaping microclimates, creating privacy, defining movement, framing views, encouraging interaction, and strengthening the identity of a place.

At Green Realm Landscape, we celebrate landscapes that evolve with time spaces where architecture and nature coexist, where people feel connected to their surroundings, and where every design decision carries a clear purpose.

Landscape is not what remains around architecture. It is part of the architecture itself.

Our Services

LANDSCAPE CONSULTATION

Professional landscape consultation by expert architects and horticulturists, offering expert guidance to transform your outdoor spaces with sustainable and aesthetic landscaping solutions.

BUTTERFLY GARDEN

Creating vibrant butterfly gardens that attract and nurture pollinators by incorporating native plants, nectar sources, and natural habitats, enhancing biodiversity and ecological balance.

MIYAWAKI FOREST

Developing dense, fast-growing Miyawaki forests using native plant species to restore biodiversity, improve air quality, and create a self-sustaining green ecosystem.

IRRIATION DESIGN

Designing and implementing efficient irrigation systems that optimize water usage, support plant health, and ensure sustainable, low-maintenance landscapes.

TERRACE GARDEN

Designing and creating lush terrace gardens that maximize green space, enhance air quality, and bring nature closer to urban living.

LANDSCAPE MAINTENANCE

Providing expert landscape maintenance services to ensure healthy, thriving, and well-manicured outdoor spaces through regular care, pruning, and sustainable practices.

Our Story

Our story did not begin with a company. It began with a family that grew up believing that nature deserves to be understood, respected, and cared for. Our connection with landscapes comes from three different disciplines united by one shared value. My father, a Landscape Engineer, brought an understanding of how landscapes are built and sustained. My mother, with her background in horticulture, taught us the importance of understanding plants as living systems. I pursued Architecture and later specialized in Landscape Architecture, learning to bring together nature, people, and the built environment.

Over the years, these different perspectives naturally came together. What started as a family's love for plants gradually became a professional responsibility.

Today, our multidisciplinary practice carries forward the same values that shaped our family: a genuine love for plants, respect for nature, responsibility towards the environment, and the belief that good landscapes should become more meaningful with time.

For us, landscape is more than a profession.
It is a responsibility we inherited, a passion we chose, and a legacy we hope to continue.

Our Family

Er.Sabu.Mathew

LANDSCAPE ENGINEER

He has over 30 years of experience in the landscape field, including 20 years as a Landscaping Engineer and Consultant with multinational companies such as Saudi ARAMCO, WESCO (England), and KEO International Consultants (UAE). He founded the firm in 2009, and for the past 14 years it has maintained a strong commitment to quality, integrity, and excellence, delivering projects across residences, resorts, parks, institutions, gardens, Miyawaki, and government sectors.

Mrs. Seema K Sabu

HORTICULTURIST

She graduated in 1986 with a degree in Horticulture from Thrissur. With a deep interest in plant studies, her extensive knowledge and experience are a true asset to our firm. She is the key decision-maker for all plant selection and horticultural aspects of our projects. She has collaborated on projects of various scales and plays a major role in site supervision and ongoing project maintenance, ensuring long-term health and quality of the landscape.

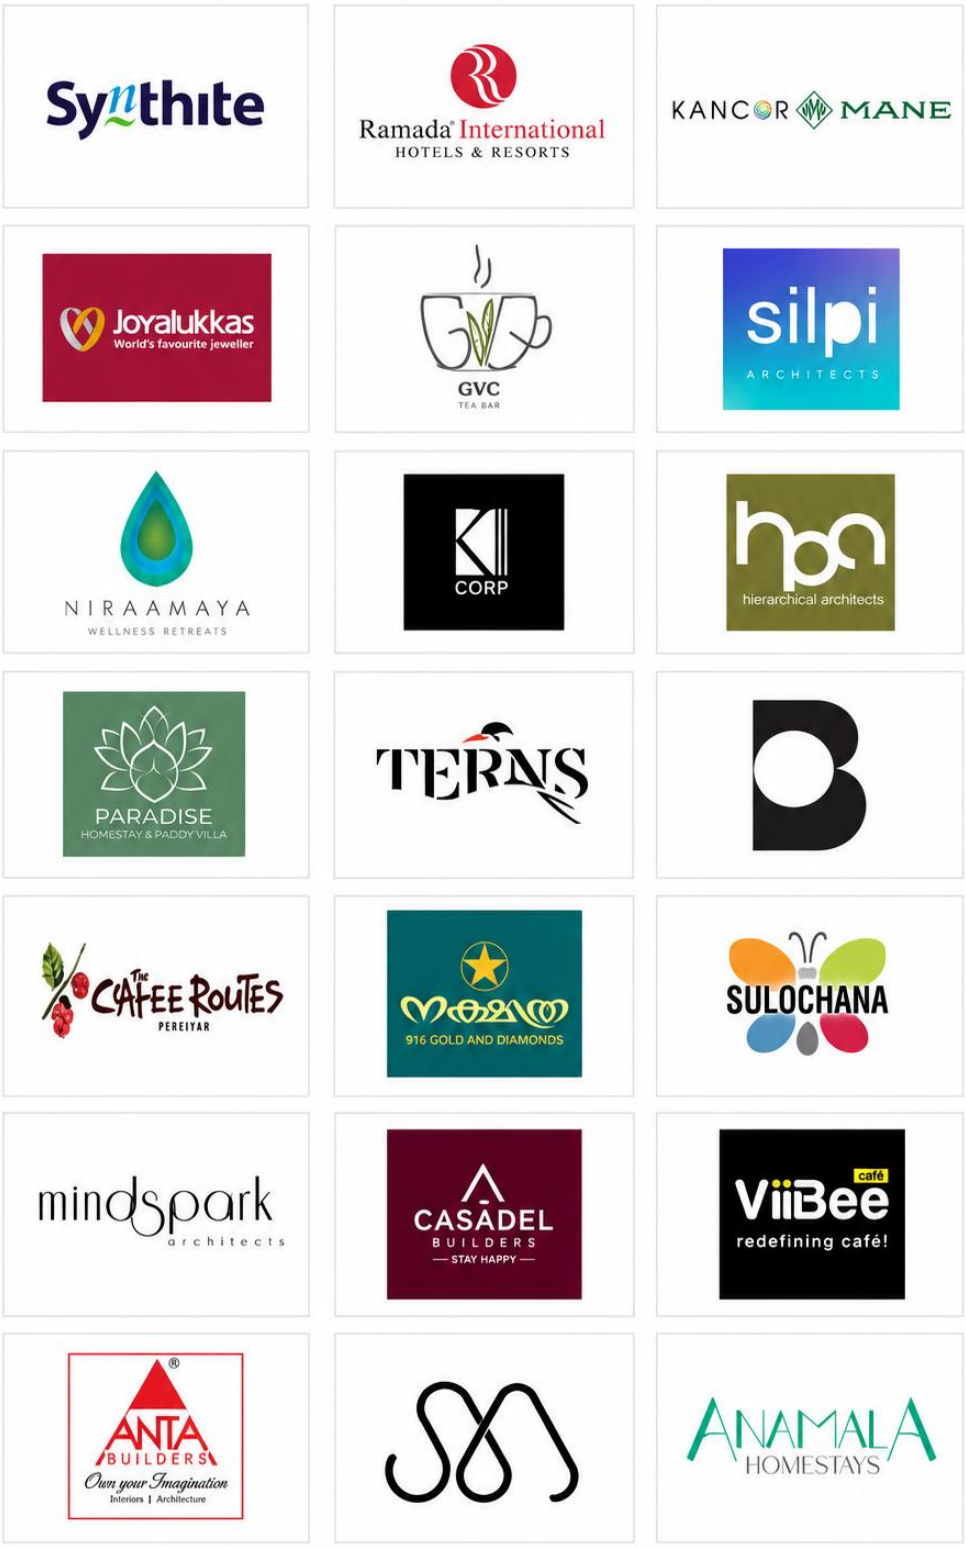

Ar.Sibin.M.Sabu

PRINCIPLE ARCHITECT

Completed Architecture graduate specialized in Landscape Architecture, with hands-on experience across diverse landscape projects and scales. He has worked under the guidance of renowned architect Ar. B. V. Doshi (Sangath, Ahmedabad) and respected architects in Kerala. His project experience spans residential landscapes, resorts, parks, schools, herbal gardens, butterfly gardens, edible landscapes, Miyawaki forests, design sensibility, technical expertise, and adaptability across contexts.

Our Process

01	02	03	04	05
Site Visit	Concept Design	Detail Drawings	Final Estimate	Contract / Consultation

Site Visit → Concept Design → Detail Drawings → Final Estimate → Contract / Consultation

Our process

Site visit

After confirmation of Quotation, we schedule a Site visit for collect data, document of site and analysis of site

Concept design

After site visit and analyzing site, we prepare a concept design based on client requirements and Architect vision

Detail Drawings

After concept design process begins with discussions with the client and Architect to align the vision and requirements. Once the concept design is developed and confirmed, we refine details, explore modifications, and finalize the detailed drawings to ensure a seamless and functional landscape.

Final Estimate

After finalizing the detailed drawings, we provide a clear plant list, cost estimate, and Bill of Quantities (BOQ) to ensure precise planning and efficient implementation.

Contract or Consultation

As per the client's preference, execution can be handled in two ways: If the client manages the execution, they must arrange gardeners and all necessary services, with our role limited to consultation. If both consultation and execution are entrusted to us, we provide a complete service, ensuring seamless project implementation.

Scope of Services / Design Process

01	02	03	04	05	06
Site Study	Consultation	Concept	Development	Documentation	Coordination

Scope of Services

NO.	PARTICULARS
1	Concept Drawing
2	Detailed Drawing
3	Bill of quantities
4	Estimation
5	Electrical Drawing
6	Consultation and site visit
7	Drainage Plan
8	Pit Drawing
9	Planting Pattern Details
10	Section and Elevation
11	Landscape detail
12	Project management schedule
13	3D render
14	Softscape details
15	Irrigation Drawing
16	Irrigation Bill of Quantity
17	Hardscape detail
18	Setout detail

DESIGN PROCESS

01 — Site Understanding

Collection and review of site photographs, videos, measurements, existing conditions and relevant site information.

02 — Client Consultation

Initial discussions to understand the client's requirements, preferences, functional needs and project expectations.

03 — Concept Development

Preparation of the initial landscape concept and design approach, followed by discussions and refinements based on client feedback.

04 — Design Development

Preparation and submission of the detailed 2D landscape drawings following concept approval.

to the selected package.

Landscape Design Fee Structure

01	02	03	04	05
Site & Area	Location	Client Brief	Scope	Deliverables

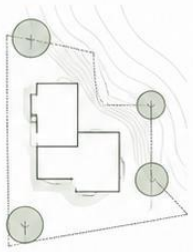

Site & Area → Location → Client Brief → Scope → Deliverables

01	02	03	04
Review	Assess	Estimate	Propose

Review → Assess → Estimate → Propose

FACTORS INFLUENCING DESIGN FEES

01 — SITE PLAN & AREA
Site dimensions, layout, topography and existing conditions.

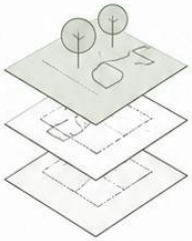

02 — PROJECT LOCATION
Geographic location, accessibility and site-specific requirements.

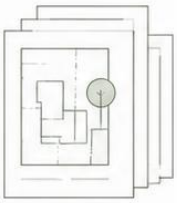

03 — CLIENT REQUIREMENTS
Design preferences, functional needs and project expectations.

04 — SCOPE OF SERVICES
Extent of landscape design, consultancy and technical services.

05 — DESIGN DELIVERABLES
Level of detailing, drawings, documentation and visualisation required.

FEE ASSESSMENT METHODOLOGY

01 — REVIEW PROJECT INFORMATION
Site plan, location, client brief and requirements

02 — ASSESS SCOPE & COMPLEXITY
Evaluate design scope, technical requirements and level of detailing.

03 — ESTIMATE DESIGN EFFORT
Based on resources, time and professional services

04 — PROVIDE LUMP-SUM PROPOSAL
A customised design fee for the agreed scope and deliverables

PROJECT-SPECIFIC DESIGN FEE

Following a review of the above parameters, we prepare a customised lump-sum design fee proposal for each project, outlining the agreed scope, deliverables and payment stages.

Any additional services or changes beyond the approved scope shall be evaluated and quoted separately.

LANDSCAPE DESIGN FEE STRUCTURE

GREEN REALM LANDSCAPE | DESIGN CONSULTANCY

Our design consultancy fees are determined by the individual requirements, complexity and scope of each project. Rather than adopting a fixed rate per square foot, we follow a project-specific lump-sum fee structure
